

https://github.com/mike-the-spike/LFCD/tree/main/Lab_5_6

Documentation:

Flex to generate lex file

Bison to generate ycc.c and ycc.h files

Gcc to compile the files together

a.exe to run the exe to scan your program from the input file

```
Microsoft Windows [Version 10.0.19044.2486]
(c) Microsoft Corporation. All rights reserved.

C:\Users\mihai\OneDrive\Desktop\LFCD\LFCD\Lab_5_6>flex lab6_lex.l

C:\Users\mihai\OneDrive\Desktop\LFCD\LFCD\Lab_5_6>bison -d lab6_ycc.y

C:\Users\mihai\OneDrive\Desktop\LFCD\LFCD\Lab_5_6>gcc lex.yy.c lab6_ycc.tab.c

C:\Users\mihai\OneDrive\Desktop\LFCD\LFCD\Lab_5_6>a.exe prime-numbers
syntax error
```

The LEX and YCC files are probably correct but I wrote the code wrong in the input file and could not focus to find the mistake.
